“ Mama I always knew this day would come one day. Never expected it to be this soon. You took your illness with grace and dignity. When the doctor told you your first words were, well what the Master wants the Master gets. We had our disagreements thru the years as mother and daughter do. I am so glad our love always brought us back to each other... you certainly taught me what is was to just be kind... have a giving heart and how to cook. You are at peace now. You wanted nothing more than to walk again, now you can. I know you were not much into dancing but I hope you and daddy will dance forever in heaven...you will be with me yesterday, today and forever.
Love you mom

“ I will always remember the day the doctor gave mom the news of her cancer. Mom looked at him with strength and said. "Well what the Master wants the Master will have.
Mom only broke 1 time over her condition. Mom took on the fight, and fight she did. She taught me to just be kind. Lead with my heart and never forget family was everything.
Mom also cursed me with wanting to feed the world... after all these years I still

cannot cook like her but I will keep trying....
Love you yesterday, today and forever...

“ I will always remember this beautiful woman who was my friend, mentor and most of all my Mama! She took me under her wing 12 years ago and treated me like one of her own. I was proud to be beside her and tickled every time I heard her yell bingo. I want to thank her children/grandchildren for allowing me to be a small part of her village and the opportunity to be by her side in the difficult times.
Fly high my beautiful Mama!
